Hej Johan Ziruo Ye & Søren Hauberg,

Vi har fået projektet "Classifier Guided Diffusion for Point Clouds" i fagprojektet.

Efter forelæsningen med Morten Mørup og gennem det udleveret materiale, vil vi utrolig gerne have produktvejledning gennem dette projekt af jer. Vi kan læse ud fra materialet at det smart at vælge forsøgs spørgsmål som vejlederen finder interessant. Så derfor vil vi selvfølgelig gerne mødes snarest muligt.

Da der kun er to grupper som har fået dette projekt, er det os uklart om vi får tildelt en af jer som vejleder. I så fald, har vi kigget på jeres DTU profiler og syntes at Søren Hauberg har en profil der falder i tråd med vores retning som K.I.D studerende.

Vi ser utrolig meget frem til at høre fra jer.

Med venlig hilsen
Henrik, William og Mads

[English]

Hello Johan Ziruo Ye & Søren Hauberg,

We have received the project "Classifier Guided Diffusion for Point Clouds" in the course project.

After the lecture with Morten Mørup and through the provided material, we would very much like to have product guidance through this project from you. From the material, we understand that it's smart to choose experimental questions that the advisor finds interesting. Therefore, we would, of course, like to meet as soon as possible.

Since there are only two groups that have received this project, it is unclear to us whether we will be assigned one of you as a supervisor. If so, we have looked at your DTU profiles and think that Søren Hauberg has a profile that aligns with our direction as K.I.D students.

We are very much looking forward to hearing from you.

Kind regards,
Henrik, William, and Mads
